on " Education in Pakistan"

Chief Minister Outlines PHEC's Agenda

The pace of a country's development is inextricably linked to its educational excellence. Unlike other development and nation-building initiatives, education cannot be valued purely in a typical cost matrix. It must instead be viewed as a critical long-term investment in creating an enabling environment for unleashing and utilizing the limitless potential of a human mind. Education gives us the potential to optimize our abilities and it is this power of an alleviated individual that ultimately contributes to the collective good and the creation of a greater people.

We exist in a world of knowledge-driven progress; 'knowledge economies' and 'knowledge societies' are the buzzwords of development. Gone are the days when natural resources and their exploitation guaranteed a nation's survival and uninterrupted progress. Today, it is the quality of a nation's human resource, a direct reflection of its educational excellence, that heralds its future amongst the comity of nations and the well-being of the people.

The Punjab government is establishing the Lahore Knowledge Park as the driving force to turn Pakistan, Punjab in particular, into South Asia's future nodal point for a global knowledge economy. The objective of the Lahore Knowledge Park is to develop and create linkages and synergy between the academia and the corporate world in areas that feed into the global knowledge industry. Tens of billions of rupees are being spent on this mega project.

To top it all, the Punjab government has set up the Provincial Higher Education Commission (PHEC) to promote research, improve capacity of educational institutions, and introduce faculty development programmes. The PHEC is playing a major role in realizing the objectives of Punjab Growth Strategy 2018 by creating job-ready and employable workforce through increased focus on structural and technical skills. These programmes have already begun to show positive results.

Our nation's long-term progress and survival depends on the quality of education provided by our universities. If we are to survive and thrive as a successful nation then the education of our people must be a lifelong uninterrupted process where excellence is the norm. In his typical wisdom our own Quaid-e-Azam told us that "Education is a matter of life and death for our nation". No more needs to be said after this.

To top it all, the Punjab government has set up the Provincial Higher Education Commission (PHEC) to promote research, improve capacity of educational institutions, and introduce faculty development programmes. The PHEC is playing a major role in realizing the objectives of Punjab Growth Strategy 2018 by creating job-ready and employable workforce through increased focus on structural and technical skills. These programmes have already begun to show positive results.

(This excerpt has been taken from 'Education is the key' written by Chief Minister of Punjab, Mohammad Shahbaz Sharif, which appeared in The News on 3rd June, 2016)

Message from Chairperson PHEC

It is a source of immense pleasure for me to see Punjab Higher Education Commission (PHEC) fully prospering into a proactive and functional organization. Since its inauguration by the honorable Chief Minister of Punjab, Mohammad Shahbaz Sharif, the Commission has achieved many milestones in a relatively short span of time. The mandate of the Commission was to primarily improve the quality and standard of academics of the higher education sector by promoting research-oriented publications amongst other contemporary methods of assessment. Instead of relying on the quantity of work, the central attention of PHEC has been essentially focused upon restructuring and enhancing the quality of education in existing Higher Education Institutes (HEIs).

This has been done through the promotion of research, development and hosting workshops for the training of teachers. So far, PHEC has initiated several faculty development programmes through which foreign scholarships have been doled out to the deserving and competent faculty members of HEIs in Punjab. Punjab Higher Education Commission has taken vital steps through Professional Development Programmes to further the quality of teaching and research. Moreover, it has also proposed to establish a teachers' training academy on the pattern of the Civil Services Academy, where teachers would be rigorously trained and equipped with modern pedagogical skills. For the promotion of culture of research, the Commission has also started arranging various seminars at public sector institutions. These steps would certainly improve the overall interface of the HEIs in Punjab.

Furthermore, the establishment of Student Counseling and Skill Development Centers are also in the pipeline to incubate market-oriented and prolific skills in students graduating from HEIs. This initiative would pave the path for students to shine within their respective areas of profession. These proposed projects would prove that students from public sector institutions possess high employability skills, if they are given an exposure to proper training and career counselling.

Hence, given the consistent pace of work and the collaborative efforts of the team at PHEC, I hope that the Commission would achieve its pre-set targets with the necessary support from the Punjab government.

Prof. Dr. Mohammad Nizamuddin
Chairperson
Punjab Higher Education Commission

Editor's Note

Greetings and a warm welcome to the first issue of PHEC's newsletter!

PHEC has come a long way since its inauguration in May 2015, as it continues to strive towards perfection and the attainment of its pre-set goals with a strong conviction of efforts by its committed team. PHEC has successfully executed most of its undertaken initiatives by putting words into action in the most literal sense. The entire team is consistently devoted towards the smooth functioning of the organization and the successful completion of its objectives.

The frequency of the newsletter will be quarterly. Our first issue would highlight various events as well as initiatives undertaken by the Punjab Higher Education Commission (PHEC) during the period of April-June 2016. It would provide a platform to facilitate and bridge the gap between the general public and public institutes, as it would clearly spread awareness about PHEC's initiatives.

PHEC is consistently thriving under the phenomenal leadership of Chairperson Prof. Dr. Mohammad Nizamuddin who is diligently leading this team towards great heights of success. PHEC has greatly benefitted from the Chairperson's visionary guidance in terms of a solid strategic plan to further the cause of higher education in Punjab, as it has never witnessed before.

We are honored to share the work of so many committed people working together as a team for the fulfillment of PHEC's remarkable initiatives.

We appreciate your support and your feedback would be welcomed.

With warmest thanks,

Promoting Research Culture through Foreign Post-Doctoral Fellowships

PHEC sent 35 scholars on Post-Doctoral Fellowships to technologically-advanced countries

Establishing and promoting a competitive research culture is the need of the hour to promote higher education in Punjab to meet international standards. There is an acute absence of robust culture of research within public sector universities and colleges.

The research activities are mostly limited in their scope. There is a dire need to revive the spirit of research in order to promote a competitive research culture, which can be aligned with industrial and technological processes taking place in various sectors of the economy.

Therefore, in the view to promote the culture of research through educational excellence, PHEC has recently awarded 35 grants under the Foreign Post-Doctoral Fellowship (FPDF) program to the faculty members of public sector colleges and universities in Punjab.

This program was announced through electronic and print media in Feb 2016. The fellowships are meant to support the faculty by improving their research and assessment skills.

The awardees will join top 200 QS ranked, prestigious universities in Asia, Europe, Canada, Australia, UK and USA. Some of the universities in USA include Stanford University, Purdue University, University of California Berkeley and University of Florida. The universities in UK include University of Bristol, University of Cambridge, University of Oxford, University of Cambridge, King's College London and various others.

PHEC will continue to make provisions for research grants by continuing its relentless efforts to promote the cause of higher education in Punjab.

Enhancing Global Exposure through International Travel Grants

PHEC awarded 37 International Travel Grants to PhD scholars and faculty members

PHEC fully recognizes the importance of academic conferences for the professional growth of faculty and realizes the financial obstacles to faculty and the research community in attending such events. In this regard, PHEC offered fully-funded International Travel Grants for presenting research papers in conferences.

The faculty, non-teaching staff and PhD scholars of provincially chartered public/private sector universities of Punjab were eligible to apply for these grants. The PHEC International Travel Grant Program was announced through electronic and print media in Feb 2016.

PHEC awarded thirty-seven (37) International Travel Grants to scholars for participation in several conferences and seminars abroad. The participants travelled to various countries which include Austria, Australia, China, Canada, Cyprus, France, Germany, Greece, Italy, Japan, Malaysia, Netherland, Poland Spain, Slovakia, Switzerland, Singapore, Thailand, Turkey, UAE, UK and USA. These grants have been awarded till 2nd June 2016 and the application process is still ongoing.

PHEC is still in the process of receiving applications on daily basis.

Training & Workshops

Professional Development Program through Short-Term Training

PHEC trained 525 teachers of different public sector universities and colleges

The Punjab Higher Education Commission (PHEC) conducted In-Service Short-Term Training sessions to train 525 newly inducted university and college faculty members. These trainings were organized at 15 different public sector universities from 2nd May to 27th June 2016.

A group photo of participants with Chairperson PHEC Prof. Dr. M. Nizamuddin and Vice Chancellor of GCU Dr. Hassan Amir Shah

This training program covered several diverse topics such as andragogical skills, curriculum and assessment techniques, designing and implementation of effective learning methods, communication skills and presentation skills for

effective oral presentation in the classroom environment.

A group photo of participants with Vice Chancellor of FJWU Prof Dr. Samina Amin Qadar and DG PHEC Dr. M. Shahid Soroya

One such training session, funded by the Punjab Higher Education Commission, was held at Fatima Jinnah Women University (FJWU) Rawalpindi. Director General (Special Initiatives) PHEC, Dr. Muhammad Shahid Soroya, was the Chief Guest at the closing ceremony. He highlighted the necessity of teachers' training for effective education dissemination in the classroom.

Capacity-building through Hands-on Training

PHEC funded workshop on SPSS & NVIVO for faculty members and researchers

The Punjab Higher Education Commission (PHEC) funded a workshop on SPSS to develop a comprehensive understanding of research tools and techniques. The training course on SPSS & NVIVO was held from 3rd to 4th June 2016 at Government College Women University (GCWU), Sialkot, in collaboration with PHEC.

Seventy-seven faculty members and researchers from GCWU attended this training workshop. It shows that there is an urge on the part of faculty members to learn substantial and effective

research techniques for self-development. Modern research methods form the essential rivets in equipping researchers to make the research more accurate and precise in terms of research outcomes.

A group photo of participants at the workshop

Cultivating Teacher's Assessment Skills

PHEC funded workshop on assessment mechanisms for young faculty members

The Punjab Higher Education Commission (PHEC) organized a workshop on assessment mechanism at the University of Sargodha, Bhakkar campus. This workshop was organized for young faculty members in June 2016.

The Punjab Higher Commission allocated a substantial budget for this workshop. The aim of

the workshop was to design specific key performance indicators to assess the performance of teachers in the classroom and their role in the betterment of classroom environment.

Seminars

Demystifying Trends in Literature & Linguistics

PHEC organized a seminar to create awareness regarding linguistic national identity amongst the students

PHEC organized a seminar to create awareness regarding linguistic national identity amongst the students.

A seminar on "Trends in Literature and Linguistics in Pakistan" was organized at University of Education (UOE) on 7th April 2016 in collaboration with the Punjab Higher Education Commission (PHEC). PHEC's Director Human Resource Development (HRD), Mussa Hassan, was the guest of honour. UOE Vice Chancellor Prof. Dr. Rauf-i-Azam chaired the seminar.

The focus of the seminar was to broaden the horizons of English language and literature students. They were told about Jacques Derrida's concept of 'deconstruction' in literature, which suggests that the thought process of literature goes beyond the actual text of the literary piece. Structural experimentation in English poetry is a visible approach seen in literature.

The spatial constructions in Pakistani English poetry were demonstrated to enlighten the participants about theoretical concepts of deconstruction in literary criticism and its stylistic modules.

Vice Chancellor UOE Prof. Dr. Rauf-i-Azam with PHEC Director HRD Mussa Hassan

Students greatly benefitted from this seminar funded by PHEC, as they said their understanding of literary criticism and the depths of regional influences on language was augmented through current themes of literature.

A group photo of faculty and participants with Director HRD Mussa Hassan

Discussion on Higher-order Thinking Expertise

PHEC organized a seminar to promote self-evaluation of the existing examination system in Punjab

A one-day seminar was held on 21st April 2016 at Fatima Jinnah Women University Rawalpindi in association with Punjab Higher Education Commission (PHEC). It was titled, "Promoting inquiry about informed practices concerning teaching and assessment of higher order thinking skills at higher education level."

The focus of the seminar was to provide an opportunity for educationists to come together for deliberations on the alignment of learning outcomes, pedagogical and assessment practices in the field of higher education. They critically reviewed the major challenges for measuring the performance of the students in an annual as well as semester-wise assessment system and tried to come up with practical suggestions for the improvement.

In the first session of the seminar, Prof. Dr. Mehmood-ul-Hassan Butt spoke on the extending

pedagogies to assess higher order thinking skills. Whereas Prof. Dr. Samina Amin Qadir spoke about the existing examination system in Pakistan and the major challenges it had been facing. She also discussed the avenues for academic and research collaboration with the wider community of higher education at the national level.

All the speakers unanimously endorsed the view that a new assessment policy is the need of the hour, which allows examinations to be expanded beyond merely covering knowledge, as it needs to include a competency assessment. This should include an observation linked to the Pakistani teaching standards.

The faculty members and educationists appreciated the efforts of PHEC for organizing this seminar and thanked it for providing a fresh stimulant on vital issues being confronted by the education sector.

Facilitating Data Analysis through Cutting-edge Tools

PHEC arranged a seminar to educate participants about statistics' role in research

The Punjab Higher Education Commission (PHEC) organized a seminar at Government Postgraduate College Sahiwal, on 11th May 2016. Assistant Director Human Resource Department PHEC, Feroze Alam was the guest of honour.

The main focus of the seminar was to emphasize the importance of statistics in the world of education by enlightening participants about the crucial role of statistics in interdisciplinary research and how they should use statistical packages to consolidate empirical research findings.

Participants were also introduced to the use of SPSS for research purposes in social sciences and its pivotal role in making the data decodable for the purpose of analysis in research work. The

appropriate use of SPSS and other methodological tools is necessary to get an objective understanding of research problems.

Participants attending the seminar

The participants appreciated the efforts of PHEC for the organization of this enlightening session. The participants were able to acquire knowledge about the utility of statistical packages for research and interdisciplinary research.

Nurturing Epistemic Debate in Scientific Research

PHEC empowered teachers to reconsider epistemological foundations of qualitative research

The University of Sargodha in collaboration with Punjab Higher Education Commission (PHEC) organized a one-day seminar on “Epistemological Foundations of Qualitative Research” on 30th May 2016. The chief guest of the seminar was Chairperson PHEC, Prof. Dr. Mohammad Nizamuddin and the guest of honour was Vice Chancellor University of Sargodha, Prof. Dr. Zahoorul Hassan Dogar.

The purpose of this seminar was to empower teachers and research scholars so that they may reconsider the epistemological foundations of qualitative research. The seminar's main aim was to enable social science researchers to produce worthwhile research publications in reputed journals.

The participants applauded the efforts of PHEC for taking this initiative for promoting research. PHEC hopes that the seminar significantly contributed to the understanding of epistemological foundations of qualitative research, as it provided a platform for teachers and students to enhance their exposure.

A group photo of participants at the seminar

Shedding Light on Regional Studies' Subaltern Narrative

PHEC stressed upon regional studies' overbearing role in the contemporary meta-narrative of Punjab

The Punjab Higher Education Commission (PHEC) partnered a two-day conference at Government College University Faisalabad on “Punjab: Past & Present” from 2nd to 3rd June 2016. It was organized at the Department of History and Pakistan Studies.

Vice Chancellor GCU Faisalabad Prof. Dr. Muhammad Ali is addressing the audience

Various historians and renowned scholars agreed that it is imperative for students to concentrate on

regional studies to understand nuances about their own culture, traditions, ethos, norms and religious values.

They made it clear in their presentations that Punjab is playing a key role in Pakistan's state of affairs because of its regional, cultural, economic and civilizational significance.

Participants were of the view that there is a need to focus on subaltern studies, which has been previously ignored by mainstream academic institutions and historians.

This initiative by PHEC would help in generating students' interest in regional and subaltern studies. Self-awareness is crucial for understanding identity through the study of history.

The speakers reiterated that the study of the subaltern perspective is extremely essential in modern times because the mainstream narrative of contemporary history does not account for the history of the common man. It is important to give the common man a voice in the public sphere otherwise they will always remain down-trodden in their deprecatory circumstances.

The participants thanked PHEC for this informative session and urged PHEC to fund such seminars in order to inculcate a sense of awareness about history and culture.

VC GCU Faisalabad Prof. Dr. Muhammad Ali is receiving souvenir

Deliberations on Pakistan's Contemporary Socio-Economic Challenges

PHEC explored Pakistan's current predicaments and their multi-dimensional causes

A two-day international conference on “Contemporary Pakistan” was organized at University of Gujrat (UoG) in collaboration with Punjab Higher Education Commission (PHEC) from 2nd June to 3rd June 2016. The aim of the conference was to find sustainable solutions to Pakistan's internal as well as external problems within the current international scenario.

Speaker addressing the audience

The conference contributed towards policy recommendations regarding important contemporary issues faced by Pakistan. There is a need to appreciate the constitutional history of Pakistan by understanding that parliamentary power has been a consistent theme in that history.

It is necessary to understand parliamentary power in the sense of its institutional value, which must

not be compromised despite the weaknesses of the parliamentarians as individuals. Political parties should focus on issue-based politics with a principled approach and recognize their own inherent weaknesses.

Speakers discussed the importance of civil society in the country's development process. One of the objectives of this conference was to promote linkages between the academia and policy-making individuals at the provincial as well as national level.

Vice Chancellor University of Gujrat, Prof. Dr. Zia-ul-Qayyum, appreciated the efforts of Punjab Higher Education Commission (PHEC) for organizing such an enlightening conference.

ترقی کیلئے جدید ٹیکنالوجی اپنانا ضروری

لاہور (اپنے سٹاف رپورٹر سے) چیئرمین ہائیر ایجوکیشن کمیشن پنجاب ڈاکٹر نظام الدین نے کہا ہے کہ تعلیم کے بغیر کوئی معاشرہ ترقی نہیں کر سکتا، جدید تعلیم پر بھرپور توجہ دینے کی ضرورت ہے۔ آئی ٹی یونیورسٹی کے زیر اہتمام ادبی فیسیٹول کے خطاب کرتے ہوئے انہوں نے کہا کہ اگرچہ جدید ٹیکنالوجی کے بھرپور استفادہ کیا جائے تو وہ دور نہیں جب پاکستان ترقی یافتہ ممالک کی صف میں کھڑا ہوگا۔

Focus on research vital for progress: Dr Nizam

Short-term training course
organised for teachers at UVAS

T OUR CORRESPONDENT

LAHORE

"We have to focus on research in social and biological sciences to boost the higher education sector," Punjab Higher Education Commission (PHEC) Chairperson Dr Nizamuddin said on Monday.

He was addressing the inaugural session of a short training course for university and college teachers.

The Centre for Educational Policy and Administration (CEPA) of the University of Veterinary and Animal Sciences (UVAS) Lahore organised the training in collaboration with the PHEC.

UVAS Vice Chancellor Talat Naseer Pasha, Faculty of Bio Sciences Dean Habibur Rehman and a large number of faculty members from the UVAS were also present.

Nizam said that it was important to adopt modern teaching methodologies. "Teaching now involves technology, multimedia, videos and documentaries. So we have to train our faculties to keep pace with the changing trends," he said. He said that the PHEC had launched various initiatives for the uplift of colleges and universities. "In-service short-term training of faculty members has been launched across the province to enhance teaching and communication skills of teachers. The PHEC is also planning to launch an Education Research Cell.

We are also working on a plan to convert degree colleges into community colleges," he said.

Dr Nizam said that the veterinary science professionals were directly involved in national development as they were providing community services at grassroots level. He appreciated the UVAS role in the development of livestock sector.

Dr Pasha appreciated the initiatives taken by the PHEC for enhancing the capability of college and university faculty

members. "UVAS teachers are equally focused on character-building. They are also involved in applied research and are currently executing 85 research projects costing Rs900 million. The UVAS is also producing vaccines for several animal diseases," he said. Dr Pasha said that the university was working in collaboration with the industry and the stakeholders. "So far, we have organised six roundtable discussions on various issues related to livestock, dairy and poultry industries this year.

This training will enhance competency and skills of teachers," he said. He said that the objective of the current workshop was to equip faculty members with advanced teaching methodologies, sound communication skills and groom their personalities.

"Resource persons will focus on communication skills, instructional strategies and techniques and designing and implementation of effective learning, curriculum and assessment techniques," he said.
